

Alexiess Manalastas

Web Developer

<https://github.com/alexiss455>

Summary

Web developers specialize in different areas of website creation, such as front-end (what users see and interact with), back-end (storing and processing data), full-stack (both front-end and back-end), and specialized areas like e-commerce or mobile-responsive websites. Their responsibilities include building, testing, optimizing, and securing websites while staying up-to-date with the latest technologies in web development
